Project Name	Package Name	Type Name	Design Smell	Cause of the Smell	Fixed	Explanation
BackEnd	ca.dal.Maverick.board.controller	BoardController	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	The controller is there to receive API calls, which is not evident by looking at just the BackEnd code
BackEnd	ca.dal.Maverick.config	AuthenticationFilter	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	This class is used for authentication
BackEnd	ca.dal.Maverick.config	HttpConfigurer	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	This class is used for authentication
BackEnd	ca.dal.Maverick.config	SecurityConfiguration	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	This class is used for authentication
BackEnd	ca.dal.Maverick	MaverickApplication	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	This is the default class used for running the application
BackEnd	ca.dal.Maverick.notifications	EmailController	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	The controller is there to receive API calls, which is not evident by looking at just the BackEnd code
BackEnd	ca.dal.Maverick.tasks.controller	TasksController	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	The controller is there to receive API calls, which is not evident by looking at just the BackEnd code
BackEnd	ca.dal.Maverick.user.controller	UserController	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	The controller is there to receive API calls, which is not evident by looking at just the BackEnd code
BackEnd	ca.dal.Maverick.user.service	UserService	Feature Envy	The tool detected a instance of this smell because getUserId is more interested in members of the type: TokenService	Yes	getUserID method and corresponding API controller moved to token module

BackEnd	ca.dal.Maverick.workspace.controller	WorkSpaceController	Unutilized Abstraction	The tool detected the smell in this class because this class is potentially unused. (Please ignore the smell if the reported class is auto-generated and/or used to serve a specific known purpose.)	No	The controller is there to receive API calls, which is not evident by looking at just the BackEnd code
